***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
  - I. Claims 1-6, 12-16, 26-27, drawn to an image generating apparatus having a specifying unit and decision unit for determining resolution of the intermediate frames, classified in class 375, subclass 240.16.
  - II. Claims 7, 11, 17, and 23, drawn to an image generating apparatus computes a matching of key frames and utilizes a multiresolutional critical point filter, classified in class 382, subclass 132.
  - III. Claims 8-10, 18-22, 28-29, drawn to an image generating apparatus for determining the intermediate frames which belongs to a range in which real-time reproduction, classified in class 375, subclass 240.28.
  - IV. Claim 24, drawn to an image generating system for processing the image between the server and client, classified in class 375, subclass 240.25.
  - V. Claims 30 and 31, drawn to an image apparatus for specifying the processing performance of the image apparatus to determine resolution, classified in class 345, subclass 419.

- 
2. Inventions Groups II, III, IV, and I are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination as claimed is to process the image between the server and

Art Unit: 2613

the client. The subcombination has separate utility such as determining resolution between intermediate frames, or generating a multiresolution critical point filter.

The inventions are distinct, each from the other because of the following reasons:

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
  4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, III, IV, or V, restriction for examination purposes as indicated is proper.
  5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
  6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
